

SAVING LIVES WITH SMARTPHONES

How H2U is Expanding Access to Lifesaving Healthcare in Rural India

Our Healthcare 2 Unreached Signature Program brings lifesaving care to people in remote areas of rural India, with a focus on decreasing maternal and infant mortality. We're proud to say that we've seen successful results in the areas we've reached so far.

Recently, we embarked on a new project to further broaden our areas of impact. This initiative, which has been tested and proven successful (to international acclaim), combines Android technology with personalized, on-the-ground healthcare to serve previously unreached areas of rural India.

Best of all, it's estimated to benefit the lives of 110,000 people in 3,000 villages. Want to see how it works?
