

Today is World Health Day, an occasion to raise awareness about healthcare issues — and to celebrate healthcare providers — around the globe.

In light of the COVID-19 pandemic, a health crisis the likes of which our world has not seen in several generations, our Disaster Relief Committee is supporting families in the U.S. and India through the distribution of grocery kits and other critical supplies. (More about that [here](#).)

Healthcare 2 Unreached (H2U)

We are also forging ahead with our H2U Signature Program, which delivers lifesaving health services to remote and underserved areas of India.

In December 2019, our H2U committee launched a three-year project (in partnership with the Rural Health Organization) to support five villages — Koutruk, Lairenshajik, Kharam Thadoi, Kangchup Chiru, and Ireng Naga — located in northeast India. Together, we are providing these marginalized communities with a Mobile Medical Clinic, health checks for mothers and children, and community meetings to address village-wide health issues.

Women and children await their checkups.

To date, this project has provided:

- 360 Health checkups for children 0-5 years
- 108 Prenatal checkups
- 78 Postnatal checkups
- 245 Vaccinations for children
- 38 Vaccinations for pregnant women
- 800 Educational health pamphlets for villagers
- ... and much more

It is clear, now more than ever, that we are members of a single global community — and that by expanding healthcare access for some, we are creating a safer world for all.

Will you help us to continue our mission?
